Nano-Align5 combined with Manual MicroStage for microscopy work.

## Product Description

The Nano-Align5 is a five axis (X, Y, Z,  $\theta_X$ ,  $\theta_Y$ ) nano-positioning system with a large center aperture. The Nano-Align5 is ideal for alignment applications which require three linear axes of motion (X, Y, Z) combined with "tip" and "tilt" ( $\theta_X$ ,  $\theta_Y$ ). The large center aperture provides excellent access for microscopy optics, sample

holders, and probe placement. The Nano-Align5 includes internal sensors with proprietary **pico** technology for absolute position measurement and picometer/nanoradian accuracy under closed loop control. The Nano-Align5 can be combined with the MicroStage and Manual MicroStage for long range micropositioning.
